

Friends Home & Village Mid-year conversations

Tyler, Karen, Chiyo & Susan

Project: Partnering with Senior Planet to offer computer skills training to older adults in lower Bucks Co.

I visited the program live on 2.21.22. There were several in the class with no skills, ranging up to some proficiency. Tyler taught the class and Karen assisted. They have subsequently added Janet Braker and Marna Matthews (both veteran teachers) as instructors. I was pleased to see that a majority of the class were not residents of FHV.

Chiyo stated that now that the equipment had been purchased, the classes could continue without additional funding.

She did ask if they could apply for another grant to plant gardens and create a sitting area where a large tree had been removed, and I responded not two grants in the same year.
